

PRESS RELEASE

Synergy of world's leading experts in Modularization, Lean & AWP on an end-to-end digital project delivery platform.

Teknobuilt and DyCat Solutions enter a strategic alliance, to offer an innovative digital platform to drive projects backed by solid industry expertise. Through the addition of their key capital efficiency strategies, projects can now improve their rate of return and can be executed with enhanced certainty. Ultimately, the experience is a safer, quicker and cost-effective outcome from project initiation to completion.

Teknobuilt brings surety and savings in execution of construction projects by use of an end-to-end digital project delivery platform PACE OS 4.0, as well as built environment industry expertise. PACE is a cloud based modular platform that anyone can use – the owner, design teams or construction, for instant visibility and granularity to precisely know what matters the most in getting things done. In addition they offer technical productivity services and expert consulting in AWP, Lean & IPD.

DyCat Solutions is specialized consulting service that provides business driven solutions tailored to improve rate of return, reduce overall cost, improve schedule and lower labor risk on projects or programs. DyCat has accomplished this by working with our customers to understand their business case. DyCat's solutions that support the business case include modularization, facility standardization, lean design along with lean execution methods, training and toolkits. The company has the "know-how" to utilize these strategies and provide the quality assurance to ensure they are executed effectively.

Together, Teknobuilt Ltd. and DyCat Solutions combine digitalization, innovation and advanced management methods to bring project execution to new levels of excellence. With a passion to help the world build better, companies can achieve their program objectives with certainty by involving this team for business success. When combined, they deliver innovation through artificial intelligence, machine learning and breakthrough capital efficiency strategies

that aim to improve project performance and guarantee success. Both companies believe that collaboration is required throughout the lifecycle of the project and the digital platform is a way to remove the silos and encourage full engagement of all stakeholders in project delivery.

Fred Haney, President at DyCat Solutions shared: “The ability to manage data in a digital framework in an efficient, lean and cost-effective method is critical to the success of DyCat’s solutions that provide project excellence. Teknobuilt brings an end-to-end digital platform with PACE that is a perfect match when applying our capital efficiency toolkit. Our alliance delivers an unmatched value in the future of project execution excellence.”

Yogesh Srivastava, CEO at Teknobuilt believes that “Getting the fundamentals of a design and construction execution strategy right, even before you consider methods such as AWP is paramount for the success of project. Helping projects with our Digital Mods™ strategy early, combined with DyCat’s modularization and off-site fabrication expertise, we can bring surety, speed and savings through digital project delivery on the PACE OS platform that will be unique for our clients.”

Meet the team: Yogesh, Fred, Cathy & Dan

Teknobuilt and DyCat Solutions are looking forward to leading the industry on a lean project execution and capital efficient strategies with our combined innovative offering. Contact us to learn more about how our alliance can add value to your project or program.
